About Us

GT Elevators Company manufacturer of all types of elevators such as Passenger Elevators, Home Residential Elevators, Glass Capsule Elevators, Hospital Elevators, Freight Elevators, Utility Elevators, and Dumbwaiters etc. We are Government registered contractors and are working with SUPERTech, ANSAL GROUP, TATA MOTORS, Public sector and other sectors. Our elevators are designed in such a manner that they are Economical to install, permit quick installation, smooth operation & allow low maintenance.

We are also engaged in imparting dependable solutions in terms of up gradation & maintenance services and installation of elevators like lift maintenance services, lift installation services, passenger lift maintenance services, building lift installation services, etc. With our vast industrial expertise and technical knowledge, we are able to serve our clients with a range that confirms to best quality standards.

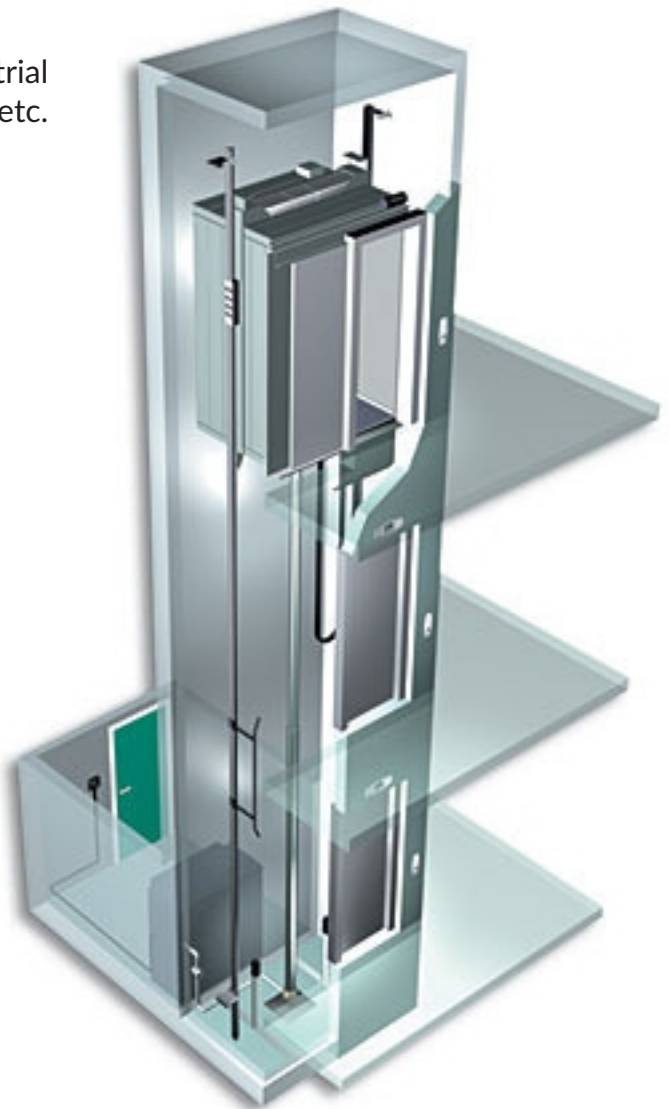

We are providing our maintenance service to various Industrial materials lifts, various apartments, commercial complexes etc. Keeping your elevators running 24x7.

Our Products Includes:

- Personal home / residential lifts
- Hoist lift /dumbwaiter
- Vertical / horizontal / slant platform lifts
- Escalators
- Passenger lifts
- Hospital bed lifts
- Freight elevator
- Utility lift (freight cum passenger lifts)

Safety and Reliabilities:

GT elevators are equipped with steel wire rope of Usha Martin make. The steel wire rope comes with test certificate this issued by the manufacture to ensure reliability & quality assurance particularly required in a passenger elevator.

Gear less Traction Elevator

The traction sheave is directly connected to the traction motor's shaft, and the rotation (speed) of the motor is sent to the traction sheave without any intermediary gearing.

Advantages

- Basement or above machine rooms.
- The incredibly low amount of noise.
- Other product lines' speeds are faster.
- AC Motor with Permanent Magnet.
- It uses less energy than geared traction.
- Ride quality is superior to hydraulic systems.
- Front/rear apertures are accommodated.
- Non-proprietary apparatus.

Gear Lifting Elevator

The Geared Lifting Unit, "MEE", consists basically of a lifting mechanism made up of a gear train that allows the study of a single wheel, a single gear system and a double gear system, determining the speed ratio, mechanical advance and efficiency

Advantages

- Maximum power capacity
- Maximum operational reliability
- Fast availability
- Modular design principle
- Suitable for transporting hot material

Passenger Lift

We offer incredible expertise in new lift installations of any kind from passenger and goods carrying lifts to documents hoists, platform lift, scenic lifts and machine room-less lifts.

We are providing our maintenance service to various Industrial materials lifts, various apartments, commercial complexes etc. Keeping your elevators running 24x7.

Goods Lift

The GTEC lift solution is a perfect machine for several challenges of freight and goods transfer in numerous buildings, including corporate towers, supermarkets, shopping malls, airports, warehouses, hospitals, hotels, industrial plants, and factories among others.

Hospital Lift

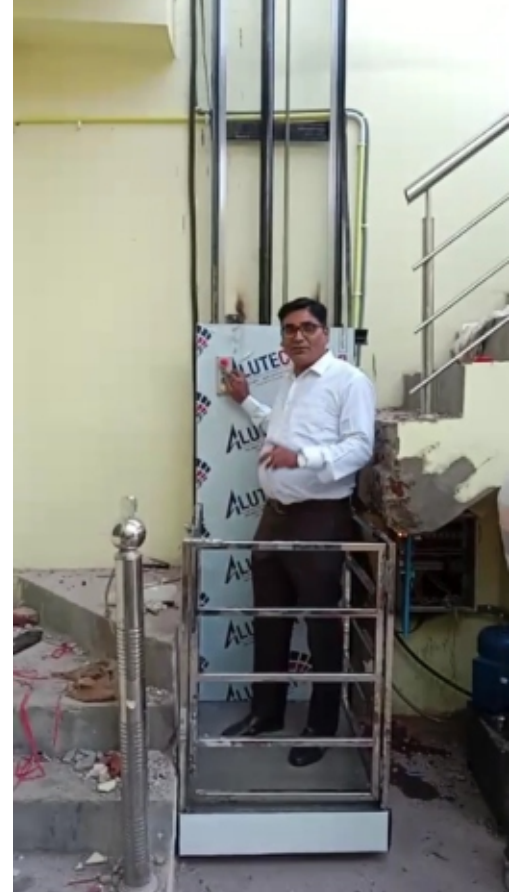

To ensure a comfortable and peaceful ride for patients, we have designed special cars that reduce unwanted noise. The door hangers are also cushioned with rubber tires to add silence to the operations.

At GTEC Elevators, we are committed to meeting your needs by providing the best hospital elevators that offer safety, reliability, and comfort.

Hydraulic Lifts

GTEC Hydraulic lifts use a hydraulic cylinder system to lift, move, and position heavy loads. While their designs vary depending on the intended application, all hydraulic lifts function using the same basic components

Chair Lifts

Straight Chair Lift

Curved Chair Lift
